## New Covid Discoveries That Discredit the Consensus (10-10-2021)

### The “Consensus” Narrative

**Deaths from COVID-19 eclipse 700,000 in US** (Oct 3, 2021) Dr. David Dowdy, an infectious disease epidemiologist at Johns Hopkins Bloomberg School of Public Health who has analyzed publicly reported state data, said it’s safe to say at least 70,000 of the last 100,000 deaths were unvaccinated people. And of those vaccinated people who died with breakthrough infections, most caught the virus from an unvaccinated person, he said.

“If we had been more effective in our vaccination, then I think it’s fair to say, we could have prevented 90% of those deaths,” since mid-June, Dowdy said.

“It’s not just a number on a screen,” Dowdy said. “It’s tens of thousands of these tragic stories of people whose families have lost someone who means the world to them

And cases in youngsters have skyrocketed as the extra-contagious delta variant has swept through the country.

\* Fauci Protocols, Not COVID, Responsible for Many Deaths in US, Dr. Ardis Says (17:33)

Video Source --> <https://thenewamerican.com/fauci-protocols-not-covid-responsible-for-many-deaths-in-us-dr-ardis-says/>

The reason hundreds of thousands of Americans died in hospitals over the last two years was not from COVID, contrary to the media narrative, warns Dr. Bryan Ardis in this interview on Conversations That Matter with The New American magazine Senior Editor Alex Newman. Instead, many of the deaths were caused by organ failure caused by the so-called “Fauci protocols” for COVID treatment imposed on the nation by the federal government and Dr. Anthony Fauci. More specifically, the deaths were caused by the drug Remdesivir, Dr. Ardis says, citing numerous studies—including one funded by Fauci’s office—that showed the drug was causing large numbers of deaths. Acute kidney and liver failure were both listed in the very study Fauci cited to claim the controversial drug was safe and effective. One study showed more than 50 percent of patients receiving the drug were dying. Once the organs shut down, the patients are put on respirators, all but sealing their fate. Make sure to share this video with loved ones.

FACT CHECKING DR. ARDIS SO THE BABY DOES NOT GET THROWN OUT WITH THE BATH WATER

DON'T NEGATE AN IMMENSELY VITAL PRESENTATION BY OVERSTATING IT OR LEAVING OUT SOME IMPORTANT PERSPECTIVE.

Although dangers of Remdesivir are clear from this presentation, I think it is wise to state a case very carefully. Death rates of Ebola are hard to pin down. Looking that up you may find rates ranging from about 35 - 90% depending on age and locality (and probably more). So to say Remdesivir killed over 50% in the Ebola study is not accurate if 50% would have died with no treatment. The fact that it was pulled with the most deaths and the high percentage of side effects like renal failure are accurate and serious concerns. But it should be remembered that Ebola is far more deadly than COVID-19. Most telling are the studies on COVID-19 patients who so quickly developed renal failure. These are far more accurate concerns and not open to the charge of leaving the normal death rate of Ebola out of the discussion. It is also an overstatement to imply that 690,000 deaths were due to Remdesivir. It appears sadly obvious that pushing Remdesivir (and ventilators) while suppressing other treatments played an immense role in deaths attributed to COVID-19. But overstating the role of Remdesivir can be used to deflect attention to the very solid case otherwise presented here.

Journeyman Pictures Interview with Erin Olszewski (1:10:35): <https://youtu.be/UIDsKdeFOMQ>

Powerful! Live video from inside the epicenter! Erin Marie Olszewski is a Nurse-turned-investigative journalist, who has spent the last few months on the frontlines of the coronavirus pandemic, on the inside in two radically different settings. Two hospitals. One private, the other public. One in Florida, the other in New York.

And not just any New York public hospital, but the "epicenter of the epicenter" itself, the infamous Elmhurst in Donald Trump's Queens. As a result of these diametrically opposed experiences, she has the ultimate "perspective on the pandemic". She has been where there have been the most deaths attributed to Covid-19 and where there have been the least.

Erin enlisted in the Army when she was 17. She deployed in support of Operation Iraqi Freedom in 2003. Part of her duties involved overseeing aid disbursement and improvements to hospital facilities. While in country she received the Army Commendation Medal for meritorious service, and was wounded in combat. Erin eventually retired as a sergeant, and became a civilian nurse in 2012.

Erin is a medical freedom and informed consent advocate. She co-founded the Florida Freedom Alliance but no longer has any connection with the organization.

Steve Kirsch: \$1 million to prove me wrong. <https://www.skirsch.io>

STORY AT-A-GLANCE from Mercola.com

So far, the CDC has not determined that any death was directly caused by the COVID shot, but that doesn't mean the injections haven't killed anyone. Calculations using VAERS data suggest the COVID shots have resulted in 212,000 excess deaths in the U.S.

An estimated 300,000 Americans suffered permanent disability from the COVID shots, and anywhere from 2 million to 5 million may have suffered adverse reactions

If you're under the age of 50, your risk of dying from the vaccine is greater than your chance of dying from COVID-19

Dr. Peter Schirmacher, chief pathologist at the University of Heidelberg, who is recognized as one of the top 100 pathologists in the world, autopsied 40 patients who died within two weeks of their COVID jab, and found 30% to 40% of the deaths were conclusively due to the shot

One top neurologist claims to have 2,000 reportable vaccine injuries in 2021, compared to zero in the last 11 years. In all, 5% of her existing patients now have suspected vaccine injuries, but she has only filed two VAERS reports due to the complexity of the filing

Here's an impressive survey about the COVID-19 injections. Read some of the 254,000 comments in repons to a TV station's question: <https://www.facebook.com/wxyzdetroit/posts/10158207967261135>

In a HighWire exclusive, Deborah Conrad, a hospitalist physician's assistant on the frontlines of the pandemic, pulls back the curtain on the complete lack and disregard in her hospital for reporting Covid vaccine injury to VAERS, this country's only mechanism to track the safety of these rushed-to-market, mandated products. In riveting detail, including emails & recorded phone conversations, Conrad exposes the internal push to turn a blind eye to injuries and "tow the company line" that this vaccine is safe.

- 27:15 What the CDC says about the injections
- 25:50 Children are dying. Morbidity and Mortality. 5 month old baby boy who died from breast milk of mother who was "vaccinated" (Thrombocytopenia).
- 19:40 Pfizer wants to start injecting 2 year olds in September. Over 900 spontaneous abortions or miscarriages. Much higher chance to lose unborn baby if mother is vaccinated (80% vs 20%). Coronavirus was not passed on through breast milk, but the spike proteins created from the injection are. The spike proteins are not localized; they spread throughout your body. The American College of Cardiology has now created a new classification of death: "Vaccine Induced Thrombotic Thrombocytopenia." CDC says "no big deal" but over 100 cases with J & J "vaccine" and more including the other injections. We're being lied to. A Calling from God.
- 16:19 Cases of myocarditis are not "mild" as the CDC says. This is weaponization of words.

- Many safety study shortcuts, including skipping animal studies and going straight to humans.
- 13:20 They unblinded and injected the placebo group! This is not even a scientific study from 7<sup>th</sup> grade science! Dr. Fauci's hypocrisy on scientific method. It is statistically and scientifically impossible to make a vaccine safer or more effective than a child's immune system. (This is not to deny the need for proper treatments for those with compromised health.)
- 12:05 This was not even a study, but just a "vaccine free-for-all".

You must be informed of risks and benefits, and you have the right to refuse. You cannot be penalized for refusal of an experimental treatment. Approval cannot be before two years of trials. Two years of trial will never be reached because the placebo group was vaccinated after six months.

-44:50 Promotion of treatment must provide fair and balanced information. Ingredients, effectiveness, side effects, and contraindications must be presented in a clear and balanced way.

The biggest crime in human history?

-57:15 Hearing with Dr. Rand Paul and Dr. Tony Fauci (Rand Paul using material Karen Kingston sent him. Dr. David Martin also sent Sen. Paul similar material.).

-49:15 How the NIH/NIAID collaborated with big pharma, big tech, and the CCP (Chinese Communist Party)

-47:45 **Review from previous interview:** The mRNA in the injections is not instructing your cells to produce the spike protein from the SARS-COV-2 virus; it is instructing your cells to produce a modified version of the spike protein. The modified protein keeps the dangerous aspects of the virus, but makes it unable to be neutralized by the body’s antibodies.

-41:55 A study of what has been developed shows little to do with a concern for human health.

-41:00 What do the developers say in their own trade journals about their reasons for development: \$\$\$

-38:00 Safety was essentially skipped in these FIH (First In Human) trials. Success was guaranteed by NIH agreements with pharmaceutical companies from 2004 through 2019. Dr. Fauci confidently predicted in 2017 that there would be an unexpected pandemic during the current administration (Trump). Bill Gates sponsored a simulation connected with the WEF. Was it purely from the motive of preparation for unknown possibilities?

-36:00 These are gene therapies, not vaccines.

-33:36 "The devil is absolutely in the details as far as LNPs are concerned." -Giuseppe Ciaramella *former head of infectious diseases. Moderna*

-30:30 Basically, whatever the spike protein binds to, it destroys.

-28:04 Words matter. Listen to their vernacular. COVID-19 PEGylated Excipients

-27:00 **SINOPEG in China manufactures all the COVID-19 injection excipients (ingredients) for all pharmaceutical companies.**

-24:20 Safety in the few animal studies done does not mean safety in humans.

-22:25 Discussion of the lipid nanoparticle and its patent. "Let's just go straight to human beings."

-17:45 In mouse studies LNPs (Lipid Nanoparticles) concentrated in the ovaries and bone marrow.

-15:00 Patents prove the ingredients. Why graphene oxide is not in the patent even though it is in the "vaccine."

-13:10 What is graphene oxide and what is it used for? 4000x stronger than titanium - excellent electrical conductor. It is used to protect the mRNA. It is neutral but can be charged.

**-10:25 The LNPs in the injections are greatly reduced in size to make it far more transmissible and very difficult to destroy. Get before God and repent. Stop being quiet and living in fear.**

Total Time: 58:36 (Time remaining is on the right side of the timeline as a negative (-) time)

The "vaccine" is transmissible ("sheds") and it is the "delta variant"

-54:30 Seek God. Ps 140:1-3.

-51:40 Evidence the Delta Variant is NOT a SARS-Cov-2 Variant (Mutation). Could mRNA(s) Shedding Spawn Delta (or other "variants")?

-51:00 Viral mutations usually become more transmissible but less deadly.

-50:30 SARS-Cov-2 = virus COVID-19 = a list of symptoms "You don't test positive for a list of symptoms" nCoV = "new coronavirus"

-48:18 Fauci Says Current Vaccines will Stand Up to the Delta Variant

**-44:30 PCR test has failed its emergency authorization review. It's a class 1 recall: far too many false positives** (PCR Test was owned by the NIH and "vaccine" manufacturers)

-41:50 \*\* Injected people can produce nCoV viral variants that cause COVID-19 through shedding and transmitting to others according to FDA documents. SARS-Cov-2 did not transmit very readily.

-39:00 "Vaccine" shedding is real. It's not a myth or "conspiracy theory." The "vaccine" is actually "gene therapy."

-37:20 Why are these gene therapies called "vaccines"? Manufacturers' liability is extremely high with gene therapy. It is virtually non-existent with vaccines under emergency use and when put on the approved vaccine list.

-33:20 They wanted to hide the fact of shedding caused by the gene therapy.

-32:25 AAPS (The American Association of Physicians and Surgeons) mentions autopsies where the mRNA injection spike protein is found in tissues, bone marrow, ovaries. . . . Moderna says they have a computer operating system in the "vaccine."

-31:10 Guidance from the FDA on Shedding Studies which was not followed.

-29:36 The injection itself is more dangerous than shedding, in general.

-28:50 A vaccine generally uses a weaker, "attenuated," virus. The mRNA injection made the spike protein stronger.

-25:18 Preclinical (before tried on humans) Assessment Guidance for Industry not followed

-24:30 Moderna and Pfizer "vaccines" are the same mRNA. But they are different doses. Dosing is supposed to be figured out before it is used on humans.

Total US Population under the age of 18 = 73,000,000

- Do NOTHING - Risk of death for all children =  $324/73m = .0004\% = 1$  in 2,500,000 (less in healthy children)
- VACCINE - Risk of myocarditis or death =  $.004\% = 1$  in 25,000 (100x greater than doing nothing)
- If VAERS is 10% underreported: VACCINE - Risk of myocarditis or death =  $.04\% = 1$  in 2,500 (1000x greater)
- If VAERS is 99% underreported: VACCINE - Risk of myocarditis or death =  $4\% = 1$  in 250 (100,000x greater)

2:30 Is Natural Immunity as Good or Better Than the Injection? Dr. Fauci A really good question. Yes natural immunity is good, but we don't know how long it will last. He should know current studies seem to show natural is better in quality and duration.

9:00 What happens to those who have natural immunity and then get the vaccine? Studies seem to show the vaccine wipes out the natural immunity from previous infection.

13:45 Commentary on President Biden's Covid Shot Mandate Speech

16:43 Is this a "pandemic of the unvaccinated"? **The narrative that we're in a 'pandemic of the unvaccinated' was created by using statistics from a time period when the U.S. as a whole was largely unvaccinated. When you look at more recent data, the trend is swinging in the opposite direction.**

18:10 **The CDC does not consider you "fully vaccinated" until two weeks after your second dose (in the case of Prizer or Moderna), which is given six weeks after your first shot. This means you won't be "fully vaccinated" until eight weeks after your first shot. Until you are "fully vaccinated", you are classified as "unvaccinated."**

**The Strange Story Of Remdesivir, A Covid Drug That Doesn't Work**

5:45 Dr. Ryan Cole's credentials (Mayo trained and more)

7:30 Is this a virus?

9:12 The benefits of early treatment. Ivermectin. Vitamin D (a very important pro-hormone - 55 or above is optimal).

11:40 Ivermectin anti-viral properties have been known for decades. The government and media are lying to you.

15:50 Follow the money. 20% bonus to hospitals for using Remdesivir which is harmful.

17:45 Since when in your career have you ever heard "It's best to wait before we treat you". . . ?

20:15 How do you get tested for your vitamin D levels? When and how much should be supplemented?

23:00 Highlights about the "incredibly dangerous drug, Remdesivir."

24:30 WHO (World Health Organization) Review of the safety of Remdesivir in April 2021. Acute renal failure (kidney failure) was 20 times higher with Remdesivir than other treatments (like hydroxychloroquine).

29:30 Hospitals keep refusing to use Ivermectin when patients demand it. Ivermectin is actually on the NIH approved or under evaluation site that physicians should consider.

32:00 How Dr. Cole helped his obese, Type I diabetic brother with COVID-19. What he does differently with the Delta variant. Don't wait. 0.4 mg/kg (2.2 pounds) for 5 days. Take with a fatty food. It's on the WHO's list of safest essential medicines.

34:55 They don't want you to have it. It's being restricted. Corporate structures are restricting it.

[www.SynergyHealthBPC.com](http://www.SynergyHealthBPC.com) - consultation fee and purchase. EARLY TREATMENT IS BY FAR THE BEST.

37:55 monoclonal antibodies are significantly effective, again, if treated early. Pre-treatments can reduce adverse reactions to the infusion.

39:55 What percent of the people infected on earth have died from COVID-19? Far less than 1% of people infected.

**\*\* 40:55 Why it is amazing that monoclonal antibodies and Remdesivir have been touted as treatments for coronavirus.**

May 2020 Dr. Fauci mandated one drug, Remdesivir, for U.S. treatment and bad-mouthed Hydroxychloroquine for causing heart disease (which it hadn't done for 70 years). Just four months earlier, in September 2019, there was a study published on the Ebola virus trials from 2018-19 that Dr. Fauci said proved Remdesivir was safe and effective and should be used against SARS-Cov-2 because, supposedly, it was effective against the Ebola virus. <https://www.niaid.nih.gov/news-events/investigational-drugs-reduce-risk-death-ebola-virus-disease>

There were four drugs in the trials. Remdesivir, ZMapp, a single monoclonal antibody, and a triple monoclonal antibody. Remdesivir and then ZMapp were removed from the study because of high death rates. Remdesivir had just over half the patients on it die and was removed from the trial. ZMapp was not far behind and also was removed, leaving only the two monoclonal antibody treatments. The least number dying while on the trial was 1/3, so there remained a significant death rate while on any of the drugs in this trial.

46:20 what about mandates? The shot doesn't cover Delta. You don't get a medication to protect others. Most health care workers already have antibodies.

Study after study proves the strength of immunity in those previously infected by #Covid is stronger to those who are vaccinated. Even CNN's resident medical talking head, Sanjay Gupta, recently questioned Fauci on growing evidence that natural infection trumps vaccine protection.

#### Explore the science that concludes:

- People in the 65+ demographic are five times as likely to die from the inoculation as from COVID-19 under the *most favorable* assumptions!
- The long-term cost-benefit ratio under the *best-case scenario* could well be on the order of 10/1, 20/1, or more for all the demographics, increasing with decreasing age. (That is, the younger you are the worse the risk/benefit ratio.)
